

# COSTPOINT BUSINESS INTELLIGENCE

Empowering Your Business for the Future.

## WHAT WE DO

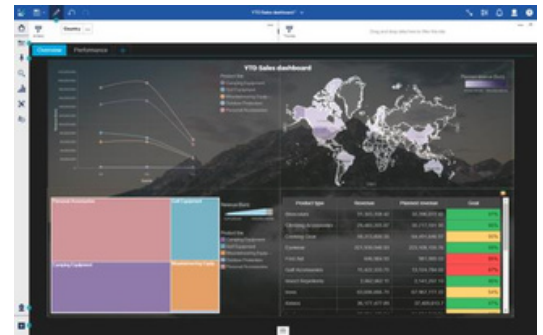

Infotek Consulting takes pride in being at the forefront of technological advancements. As an early adopter of Costpoint BI, integrated with Cognos Analytics, we have successfully delivered comprehensive technical upgrades, report development, training, testing, and documentation services. Our decade-long track record includes partnering with esteemed Government Contractors in the Services, Non-Profit, and Manufacturing sectors.

Unlock the full potential of your business with Infotek's expertise in Costpoint BI migration and new deployment, seamlessly integrated with Costpoint 8.x framework and security. Our all-encompassing CER upgrade package encompasses server installation, configuration, content migration, security migration, deployment, and in-depth training on the capabilities of Costpoint Analytics.

## REINVENTED BUSINESS INTELLIGENCE

### IBM Cognos Business Analytics

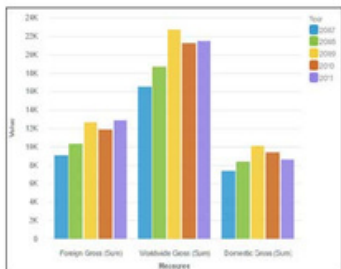

- Integrated solution for managing reporting and business user self-service
- Designed for ease of use with a graduated user experience that enables analytic consumers to progress to access and model data and create visual dashboards and stories on their own
- Smarter self-service uses built in intelligence to guide data modeling and authorizing based on intent

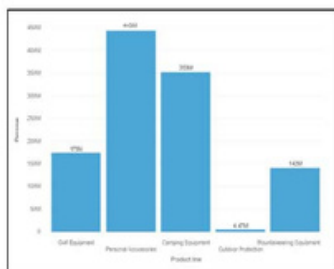

## ENHANCEMENT HIGHLIGHTS

- Make the old new with updated dashboard, modeling and navigation experiences, and new logging framework
- Easier to use with dashboard filter dock, filter panel, my parameters and interactive performance assistant
- Make it your own with 3rd party OpenID connect support and Image library extension
- Communicate through storytelling and animated path transitions
- See things clearly with visualization improvements, maps in reports, measures on axis, labels and repeaters
