

COSTPOINT GOVCON CLOUD MODERATE

Experience Enhanced Security, Scalability,
and Efficiency for Government Contractors.

Increased Security

GCCM is built on top of the AWS GovCloud platform, which is designed specifically for government workloads that require the highest levels of security and compliance. The platform meets strict security requirements, such as FedRAMP Moderate compliance.

Scalability

GCCM is a cloud-based solution, which means that it can quickly scale up or down depending on the needs of the business. This makes it an excellent choice for growing government contractors that need to manage more contracts, projects, and resources.

Accessibility

GCCM is accessible from anywhere with an internet connection, which makes it easy for government contractors to collaborate with team members and stakeholders across different locations. This can improve communication and increase productivity.

Financial Management

GCCM includes robust financial management features, such as billing, invoicing, and revenue recognition. This can help government contractors manage their finances more efficiently and accurately, which can ultimately lead to increased profitability.

Compliance Management

GCCM includes features that help government contractors stay compliant with government regulations and industry standards, such as the Defense Contract Audit Agency (DCAA) regulations. This can help government contractors avoid penalties and maintain a good reputation within the industry.
